

Mitra Medical Suite - Mockup

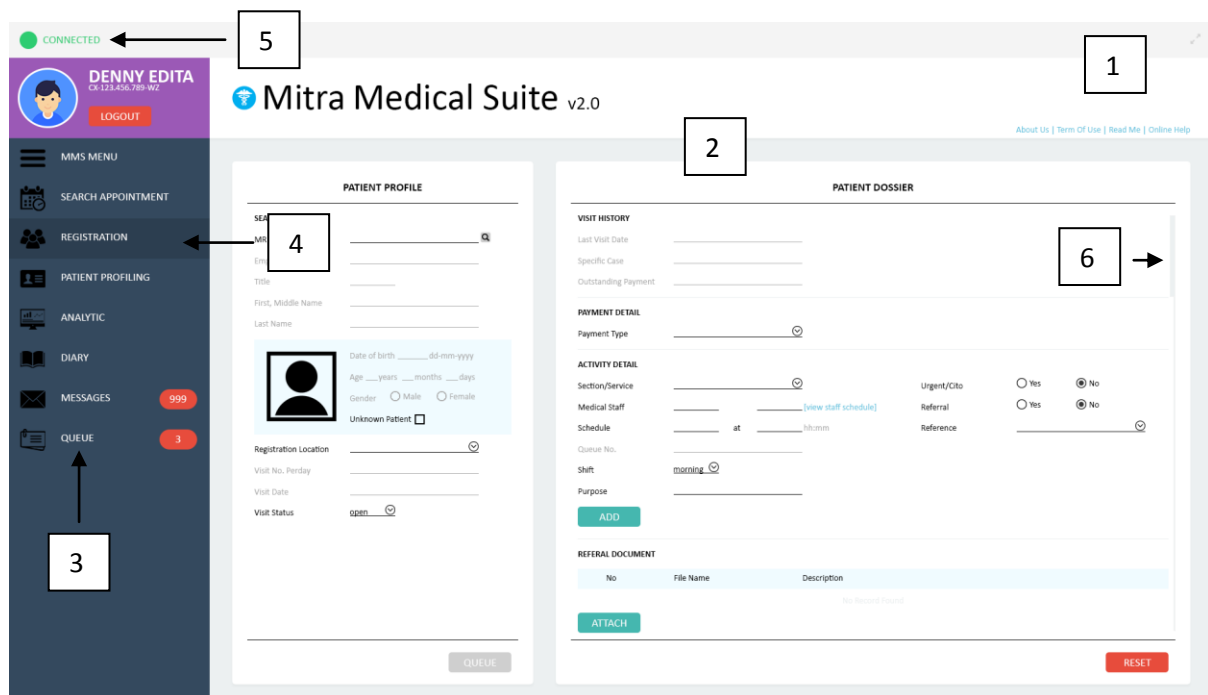

illustration 1

1. Fresh new layout, modern, modular, clean and friendly. I choose flat and soft colors, since they are Comfortable to see for a long time.
2. Mobile/Touch screen support, each module has its own section separated by its function.
3. Added new functionality improvement.
 - a. Message menu, to read, write, store and send message to staff members.
 - b. Queue menu, to put patient into waiting list for certain needs.
4. Each active menu has its different effect and icon.
5. Added Server connection status (server → client).
6. The scroll bar, by default is hidden, will be appear if user making scroll gesture or hover the mouse pointer at the edge of the module.
7. Disabled text field marked with gray color.
8. Active text field marked with black color.

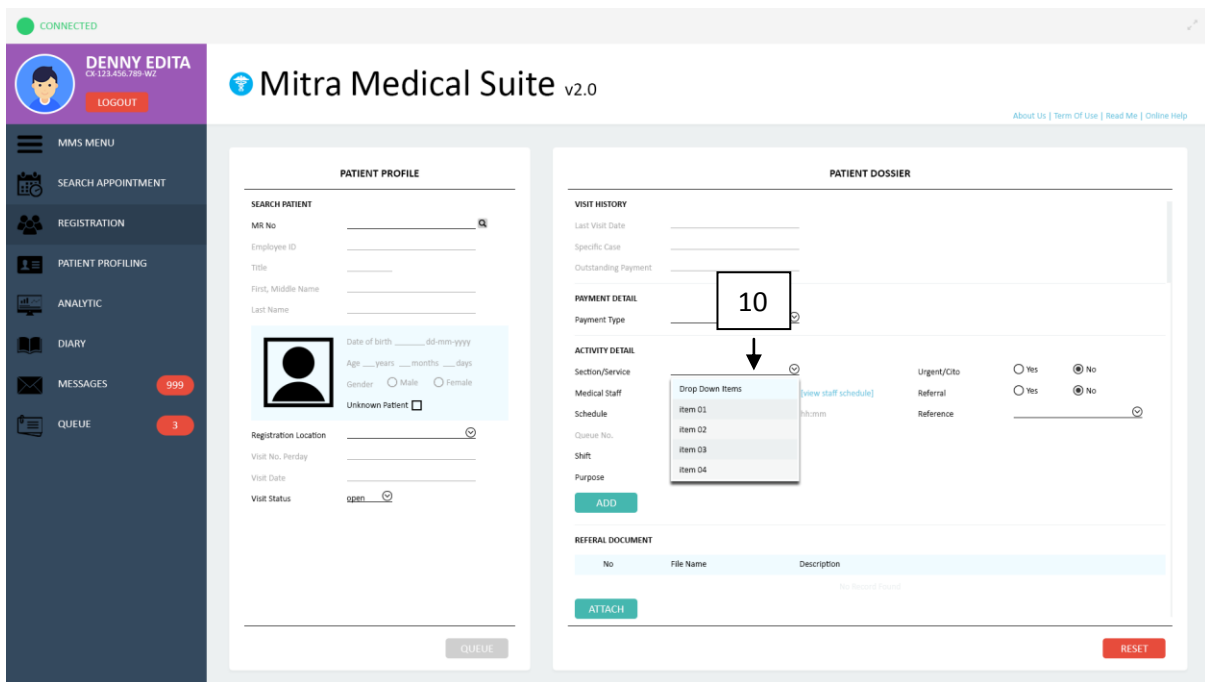

illustration 3

Redesign supporting features:

9. Ajax Smart Search, with more compact design and clean pop-up (illustration 2).
10. Drop Down, with more compact design and clean pop-up (illustration 3).

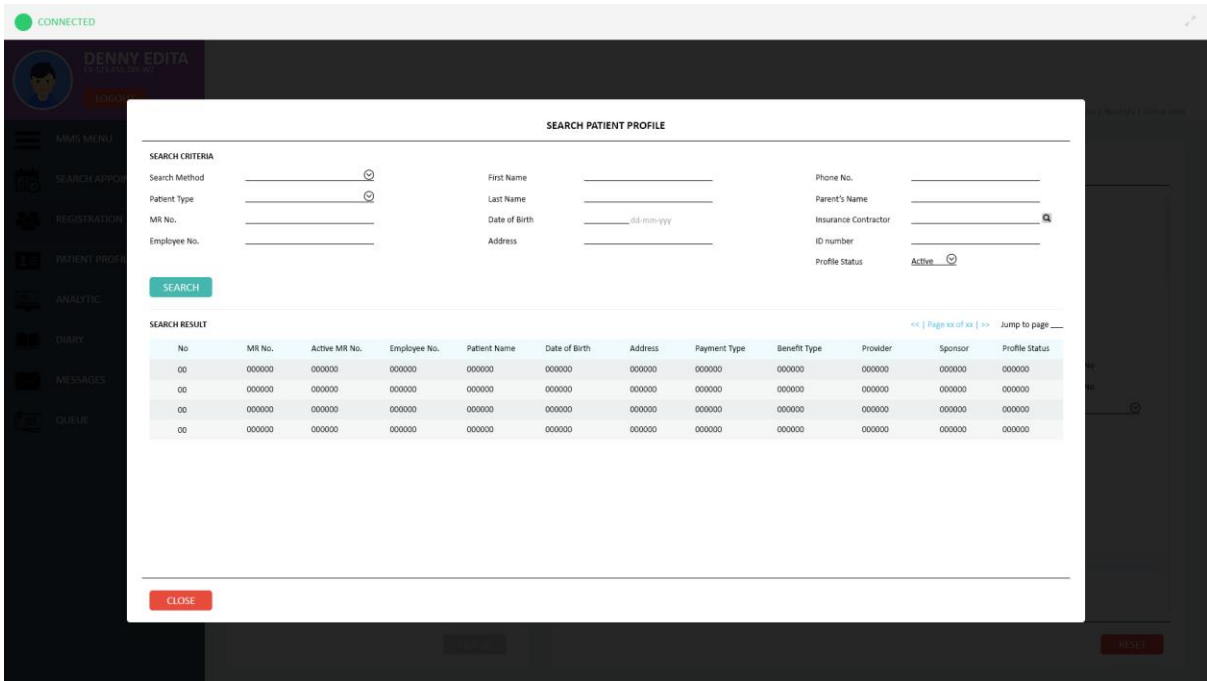

illustration 4

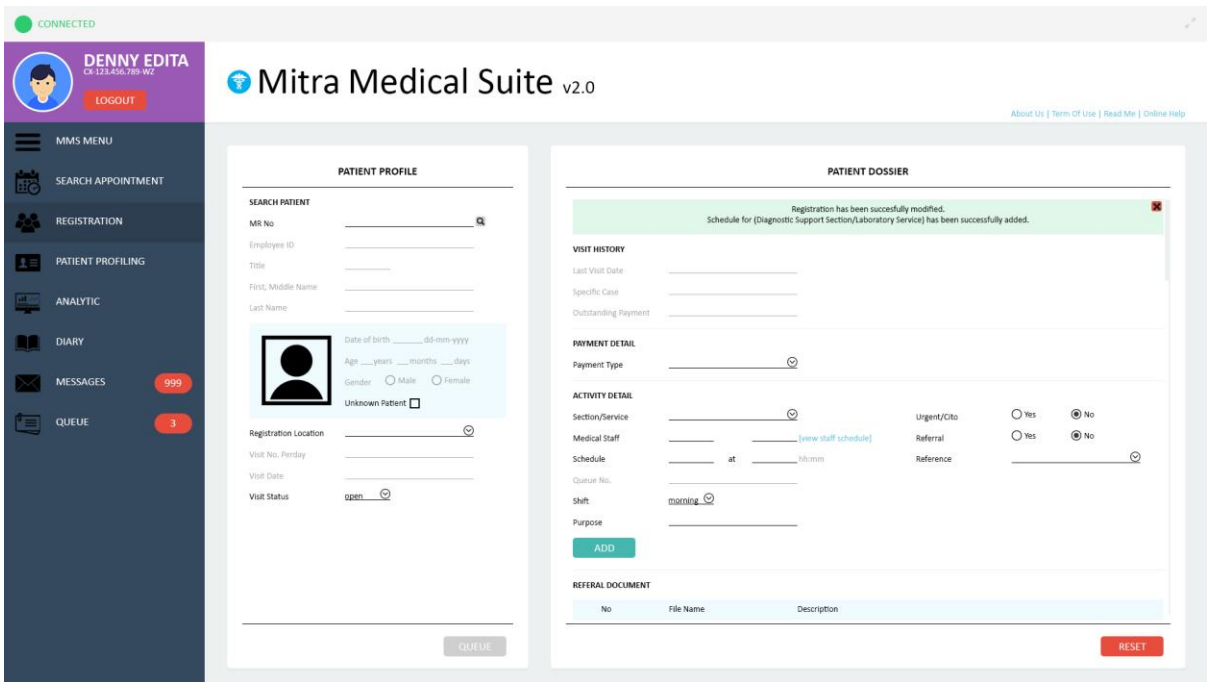

illustration 5

Highlight features:

1. User or Data (value) search pop-up replaced with Modal Dialog, to get better understanding and display more information + filter option (illustration 4).
2. Event Notification is now highlighted, highly visible and noticeable (illustration 5).

illustration 6

Flat colors collection, used for MMS layout (illustration 6).
